Backoffice Access [🔗](#)

1 Step

1

How to sign up or sign in

- As an external user, once you sign up using your non-official email, an Admin assigns you a role.
- As an internal user, once you sign up using your official email, an Admin also assigns you a role

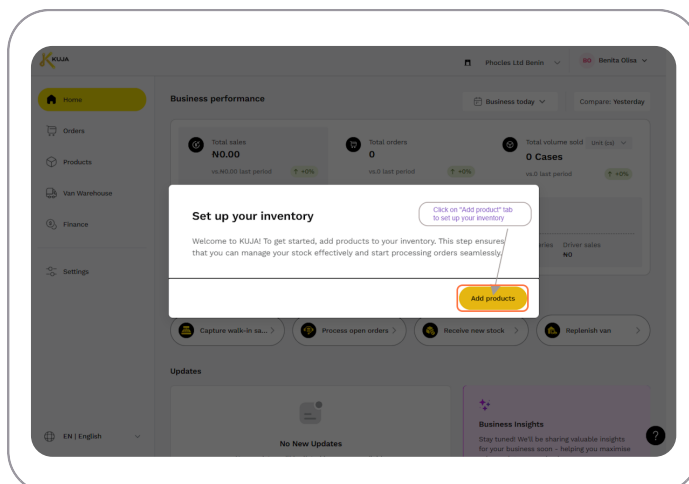

Inventory Set up [🔗](#)

4 Steps

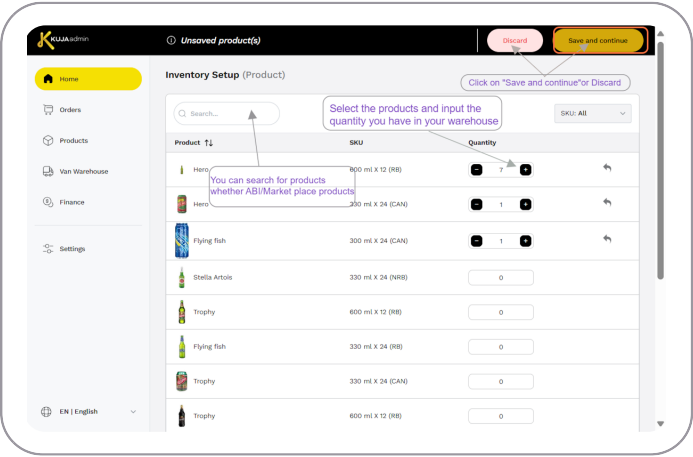

2

Click tab to set up

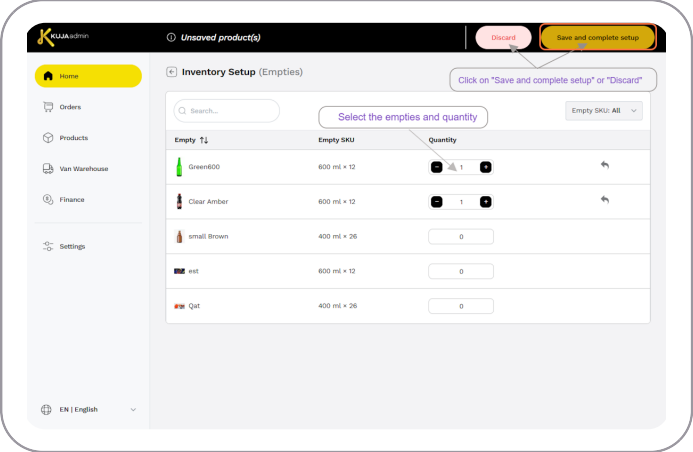

- As a newly registered distributor, you need to set up your KUJA inventory to reflect your physical stock at your warehouse.
- A physical stock count needs to be done at the warehouse.
- Once an accurate physical stock count at the warehouse has been done, the values are registered into the system.

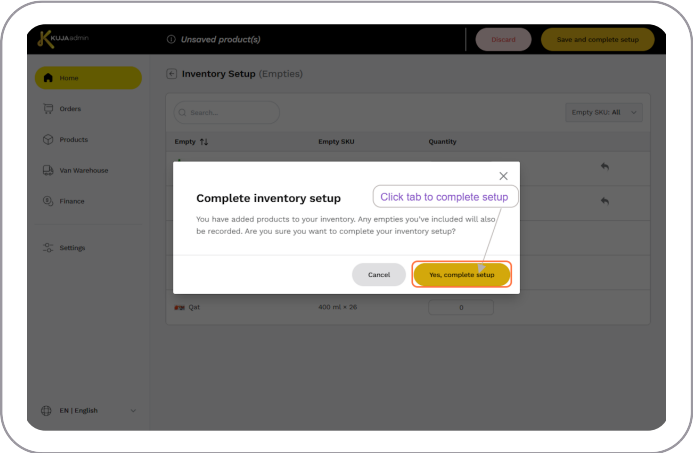

3 Input Products

4 Add Empties

5 Complete setup

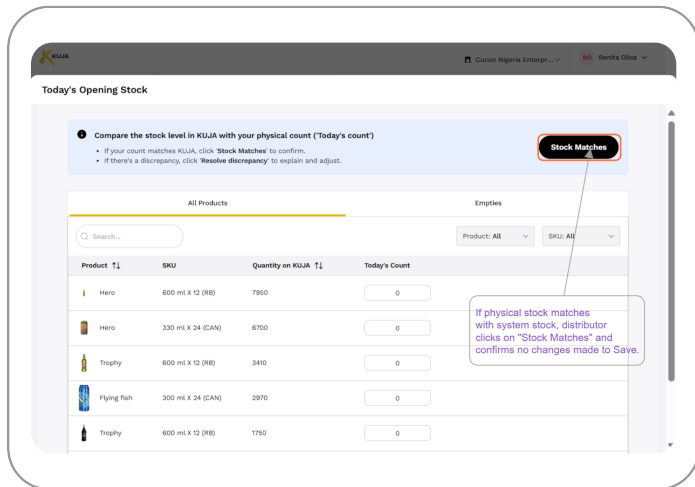

Daily Stock Count

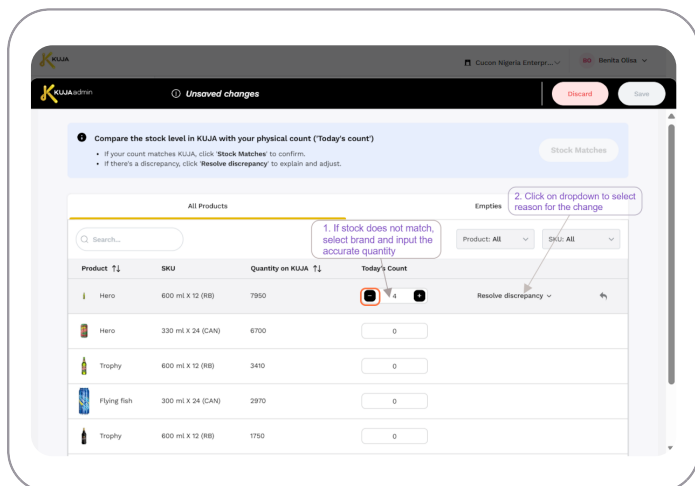

5 Steps

6 Stock Match

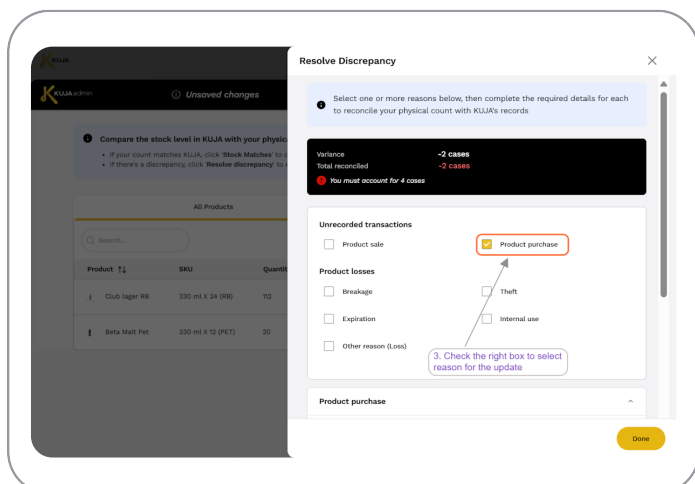

- Every morning, a system pop-up prompts distributors to perform a physical stock count, verify it against system records, and resolve any discrepancies.
- In cases where physical stock matches with system stock, the distributor clicks on "stock Matches"
- If there are discrepancies, the distributor adjusts system stock to reflect the physical stock counted.

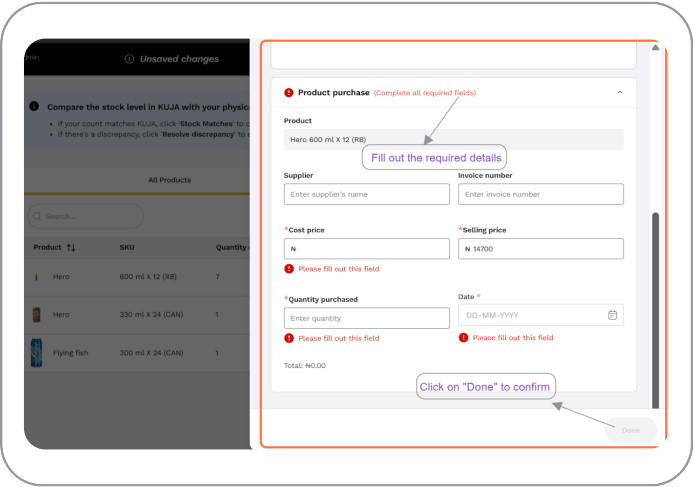

7 Resolving Discrepancy

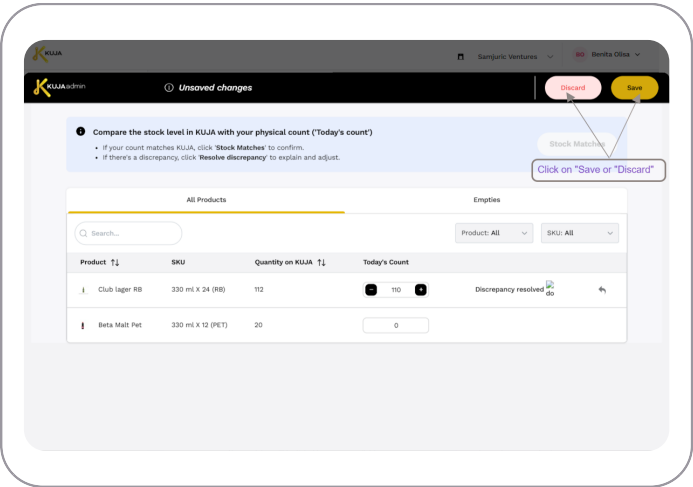

8 Resolving Discrepancy II

9 Resolving Discrepancy III

"Home" Module 

1 Step

11 View activities in this module

The "Home" module gives an overview of;

- The distributor's business performance
- Some frequently used tabs
- Updates on low stock or products that are out of stock
- Insights that can help the distributor grow their business... etc

"Orders" Module [🔗](#)

13 Steps

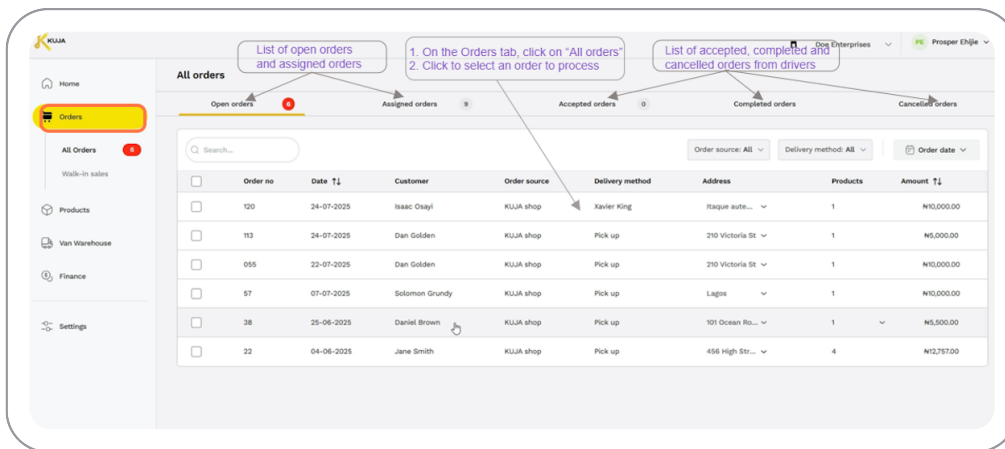

12 View activities in this module

The "Orders" module is divided into 2 -

- Capturing orders raised by customers from other applications
- Capturing walk-in sales from customers who walk into the warehouse to buy.

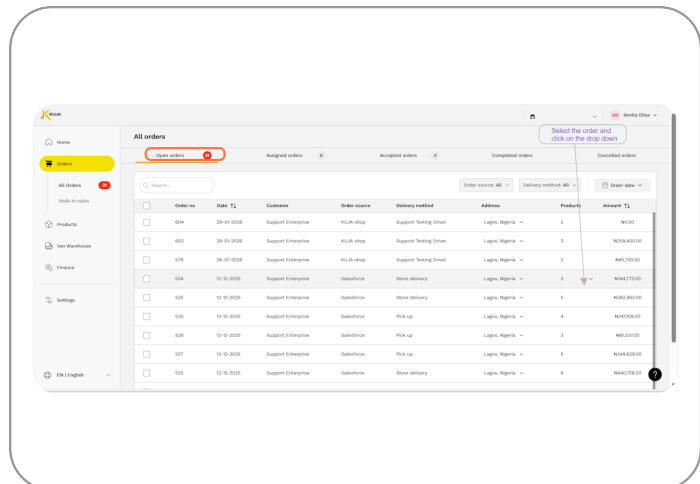

The Orders Module shows -

- a list of all open, assigned, accepted, completed or rejected orders.
- the details of the orders raised, including the details of the customer that raised the order, the date and time it was raised, the order source and delivery method, etc.
- how walk-in sales can be captured either to a registered or non-registered customer.

13 Open Orders

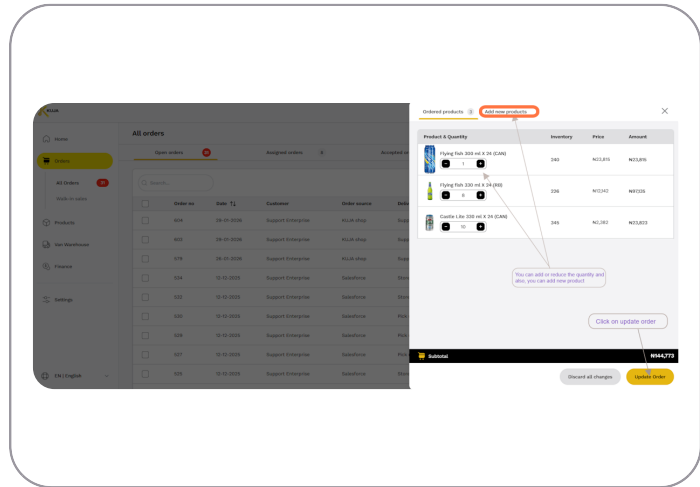

- This chart shows how the distributor or back office can edit or update a customer's order, including adding more products before it is processed.
- Select the order you want to update
- Click on the drop down

14

Update Order I

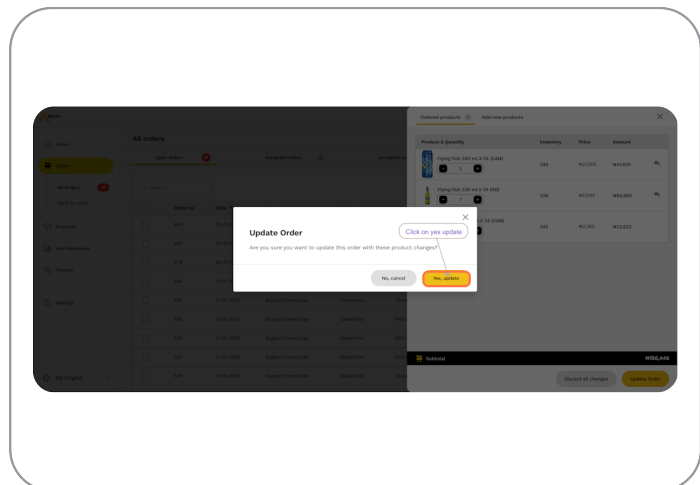

- Use the "+" and "-" button to add or reduce the quantity of the customer's order
- You can also add new products
- Click on "Update Order" when you are done editing the order

15

Update Order II

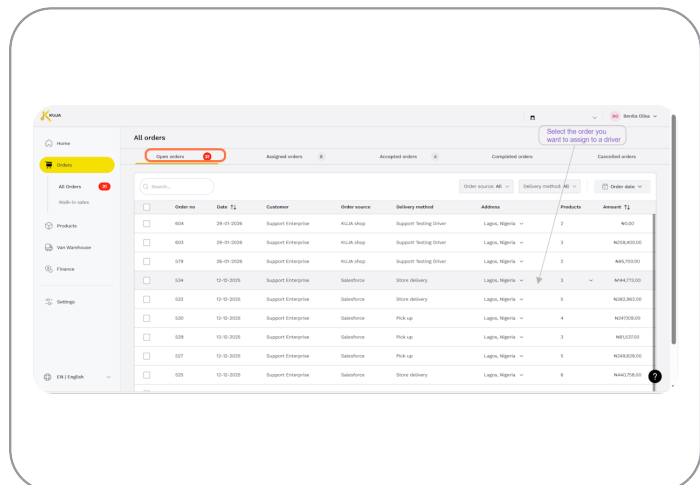

- Click on "Yes, update" to confirm

16

Open Orders II

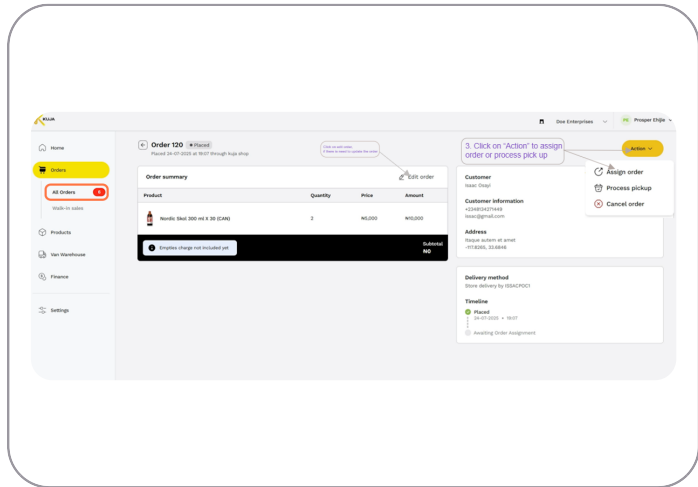

- This chart shows how the distributor or back office can assign an order to a driver or customer's order.
- Select the order you want to assign to a driver

17

Assign order

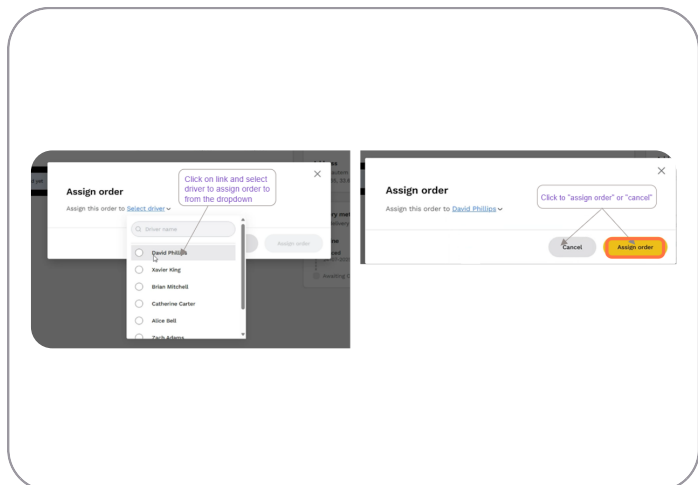

- You can edit the order if the customer wants you to.
- Click the action tab and select "assign order".

18

Assign order II

- Click "select driver", select the driver you want and click "assign order"

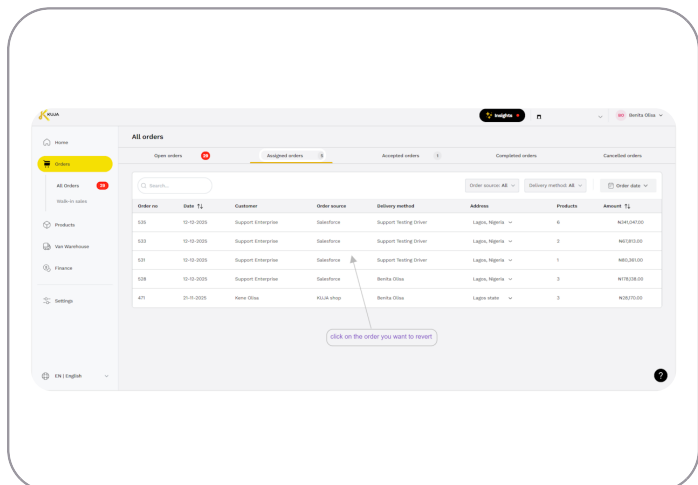

19

Revert Order

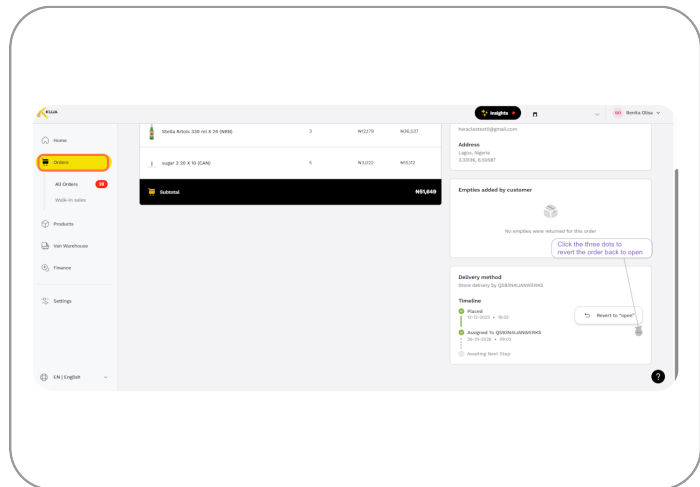

This Chart shows how you can revert an order you assigned to a driver to open order.

- Go to the assigned orders and select the order you want to revert

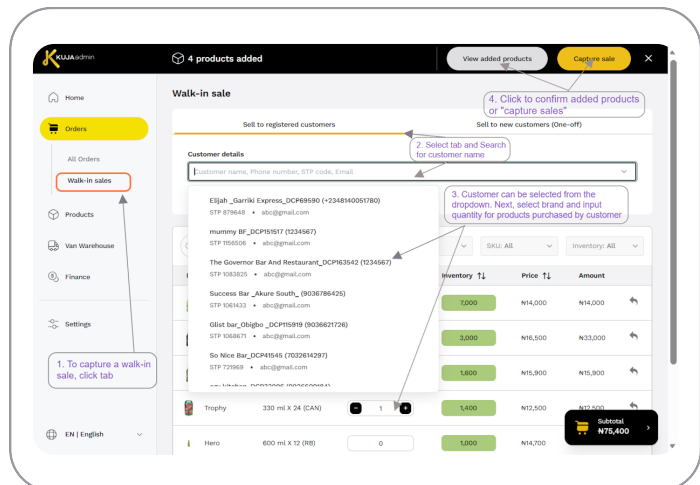

20 Revert II

- Click the three dots icon to revert your order back to open order

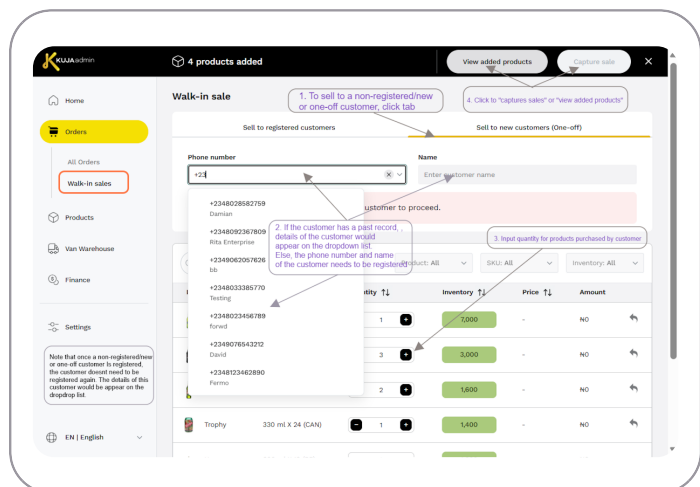

21 Capture Walk-in sales I

This chart shows how to capture sales to registered customers. Registered customers are customers who have a unique code with the business, and have their details registered in KUJA.

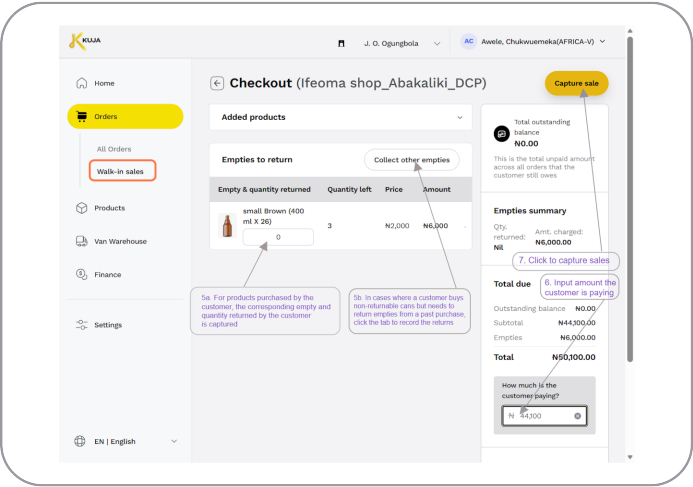

22 Capture Walk-in sales II

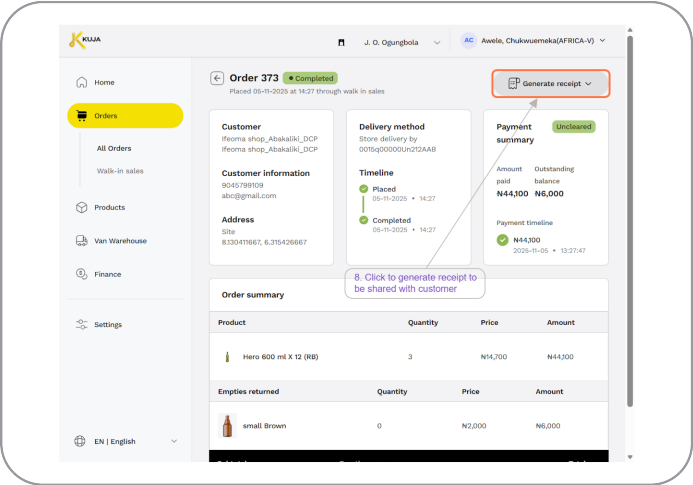

This chart shows how to capture sales to non-registered customers. Non-Registered customers are customers who do not have a unique code with the business, and do not have their details in the company's database. Empties are captured and receipt are generated same way as to registered customers.

23 Capture Empties Returned

24 Generate receipt

"Products" Module

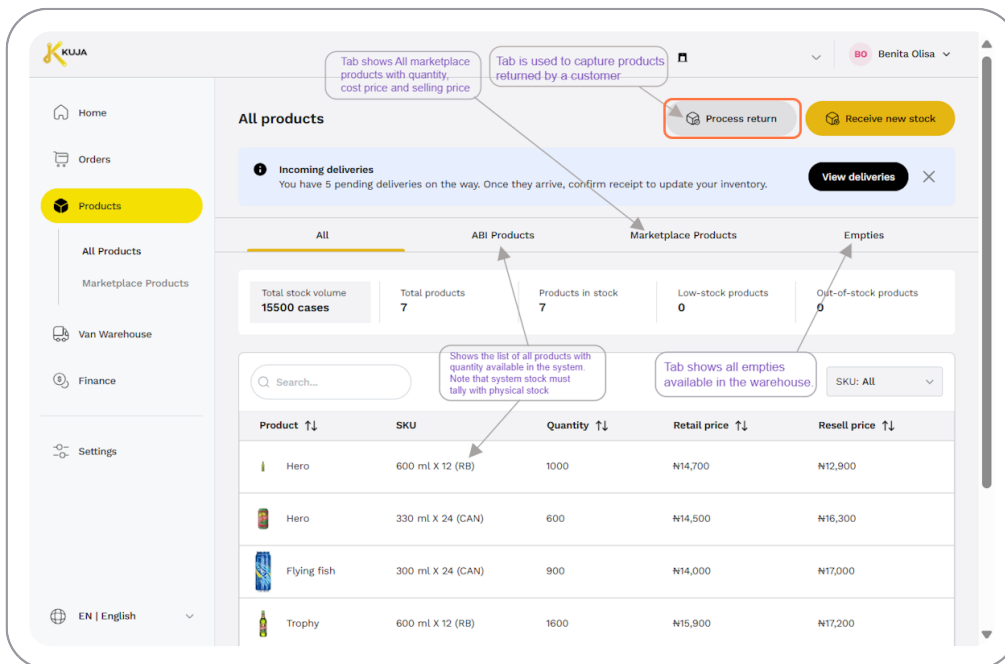

19 Steps

25

View activities in this module

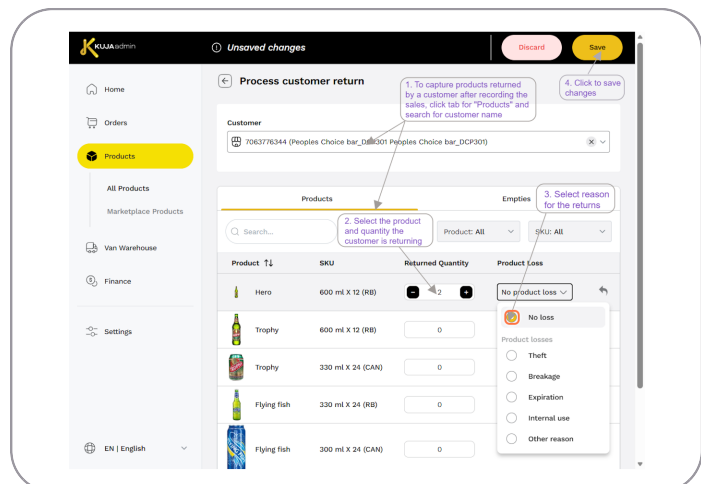

The "Products" module shows;

- The warehouse inventory level – all available ABinBev products, all available Marketplace products and all empties that a distributor has in his/her warehouse.
- The details of these products such as the recommended price, quantity available etc.
- A tab used to capture newly received products.
- A tab to capture products or empties returned by a customer after purchase is captured.

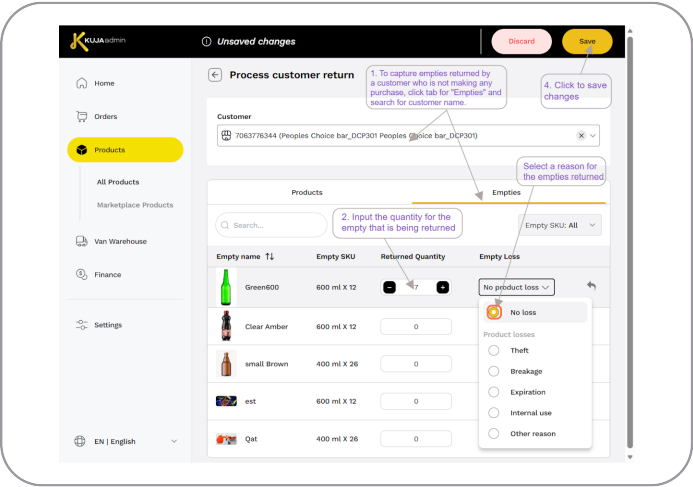

26
