

How to add marketplace products? On KUJA, you can add new marketplace products. Go to the product module. Click Marketplace products. Click add a product. Enter the name of the product. Then click add Pepsi. Or the product name you entered. Search or create a new SKU. Or select an existing SKU. Enter the quantity. Enter the cost price. And the selling price. Click to upload the product picture. You can also add another product if needed. Finally, click save. You will now see the product added to your marketplace. This process ensures products are properly displayed in your marketplace for sales.
