

How to assign an order to a driver? On KUJA, you can easily assign orders to a driver. To do that, go to the Quick Action tab on the homepage. Click Process Open Orders or go to the Orders tab and select Open Orders. Select the Store Delivery order. Click the Action tab. Choose a Sign Order. Then click Select Driver. Choose the driver you want to assign the order to. And click a Sign Order. The order will automatically move to the assigned orders list. By assigning orders to driver, you keep deliveries organized and ensure every order is tracked.
