

How to collect customers' balances? On KUJA, you can collect customer balances to do that. Go to the Finance Module. On the Quick Action tab, click View Customer Balances, or click Customer Balances. Here, you will see all the customers that are owing. They're outstanding balances and the status. Whether they have cleared their bill or are still owing, to collect a customer balance, select the customer, click Collect Payment, input the amount the customer is paying, then click Collect Payment again. Confirm by clicking Yes, Collect Payment. Once you are done, the customer's status will move to cleared. This process ensures outstanding balances are tracked, and payments are recorded.
