

How to Process Customers Return If a customer wants to return products or empties, KUJA makes it simple. Go to the Product Module. Click Process Return. Search for the customer's name. Select the brand they want to return. Enter the quantity they are returning. Then click on the drop down, and select the condition of the products. Navigate to the empty section. Select the empties they are returning. Enter the quantity. Choose the condition of the empties. Click Save. Then click Yes, Confirm Return. This process ensures return products and empties are recorded correctly. And your inventory stays accurate.
