

How to replenish a driver's van? On KUJA, you can replenish a driver's van with new products in just a few steps. On the homepage, go to the Quick Actions tab, and click Replenish van, or go to the van warehouse module, and click Replenish van. Click on the drop-down, and go ahead to select the driver you want to replenish their van. Select the product you want to assign to the driver. Enter the quantity. Then click Replenish van. Finally, click yes, Replenish. This process ensures drivers have the right stock in their vans, and inventory stays accurate.
